

# Henrique Ferreira

## Web Developer

I am a Graphic Designer, who dared to venture into the codes and ended up falling in love! I consider that the main thing for any job is to have an open mind to all possibilities of learning. Curiosity about how the world works is what motivates me to always seek to learn and improve myself. I am punctual, assiduous, responsible, very communicative and very easy learning. I am moved by the contact between people and the exchange of experiences.
